

# Yoga & Sports

1) What is Physical Fitness? How to obtain physical fitness?

Ans:

1. **Cardiorespiratory Endurance** – The ability of the heart and lungs to supply oxygen.
2. **Muscular Strength** – The power to lift, push, or pull.
3. **Muscular Endurance** – How long your muscles can keep going before fatigue whispers “stop.” (Bhagor, elah)
4. **Flexibility** – The freedom of your joints to move through their full range, like a body that breathes instead of resists. (boneless)
5. **Body Composition** – The ratio of fat to lean mass, showing how efficiently the body stores and uses energy.
6. **Coordination & Balance** – The harmony between muscles and mind; how fluidly you control your movements. (kiman jldi reaction dibo pari, monot kiba cinta korar pisot action lobole kiman tym lage)
7. **Adaptability** – The capacity to respond to physical or environmental challenges — the quiet proof that fitness is, above all, resilience. (adjustable in every nature, nature change, place change huar loga log bemar hua manuh)

II) What is wellness?

Ans:

- **Holistic Health –**

Yoga defines wellness as a balance between body, mind, and soul, not just the absence of disease.

- **Physical Well-being –**

Achieved through *Asanas* (postures) that improve flexibility, strength, and internal organ function.

- **Mental Peace –**

Practices like *Pranayama* (breathing) and *Dhyana* (meditation) calm the mind and reduce stress.

- **Emotional Stability –**

Yoga teaches self-awareness and control over emotions through mindfulness.

- **Spiritual Growth –**

Helps individuals connect with their inner self and develop a sense of harmony with the universe.

- **Balanced Energy –**

Through proper posture, breathing, and meditation, yoga maintains the flow of life energy (*Prana*) in the body.

III) What is lifestyle?

Ans

- i) By practice **eight limbs of yoga (Ashtanga Yoga)**
- ii) **Balanced Diet and Routine** – Follow a *sattvic* (pure and simple) diet and maintain a regular daily routine.
- iii) **Positive Thinking and Compassion** – Cultivate kindness, forgiveness, and a peaceful attitude toward all beings.

\*\*\* What is Ashtanga Yoga

Ashtanga Yoga, described by Sage Patanjali in the *Yoga Sutras*, is an eightfold path that provides a complete guide for self-discipline, physical health, mental control, and spiritual growth. The eight limbs are:

- i) **Yama** – Moral and ethical discipline
  - ii) **Niyama** – Personal observances
  - iii) **Asana** – Physical postures
  - iv) **Pranayama** – Breath control
  - v) **Pratyahara** – Withdrawal of senses
  - vi) **Dharana** – Concentration
  - vii) **Dhyana** – Meditation
  - viii) **Samadhi** – State of spiritual absorption or enlightenment
- 
- i) **YAMAS** – ethical restraints (how we relate outwardly to others & the world, in short – social discipline)

Explanation: There are **5 Yamas**

**1. Ahimsa — non-violence / non-harm**

- **Sanskrit + literal:** अहिंसा — “no-harm.”
- **Meaning:** Avoiding physical, verbal, and mental harm toward all beings (including oneself). Not only refraining from violence but also avoiding hatred, anger, cruelty, and careless speech.
- **Practical examples:** Don’t hit, insult, or bully. Avoid harsh words, gossip, or mental hostility. Choose compassionate food choices if that aligns with you. Practice self-care rather than self-abuse.

- **How to practice:** Mindful speech checks, pause before reacting, loving-kindness (metta) meditations, restorative asana for soothing the nervous system. Small daily acts of kindness.
- **Benefits:** Lowers reactivity and guilt, improves relationships, reduces stress and aggression, cultivates empathy.
- **Pitfall:** Confusing non-violence with passivity — ahimsa can require courageous action (e.g., speaking up against injustice) performed without hatred.

## 2. Satya — truthfulness

- **Sanskrit + literal:** सत्य — “truth.”
- **Meaning:** Being honest in thought, word, and deed — aligned with reality and integrity. Also means not exaggerating or intentionally misleading.
- **Practical examples:** Speaking honestly but kindly; owning mistakes; not pretending to know or be something you’re not.
- **How to practice:** Pause and ask “Is this true? Is it necessary?” before speaking. Journaling to uncover internal truths. Practice compassionate truth — honest yet caring.
- **Benefits:** Builds trust, clarity, and self-respect; reduces cognitive dissonance and anxiety from maintaining falsehoods.
- **Pitfall:** Brutal honesty that hurts others — satya is balanced by ahimsa; truth should be delivered with compassion and discretion.

## 3. Asteya — non-stealing

- **Sanskrit + literal:** अस्तेय — “non-stealing.”
- **Meaning:** Not taking what isn’t freely given — includes physical items, time, credit, attention, ideas, and energy. Also resisting envy of others’ possessions.
- **Practical examples:** Don’t take office supplies, plagiarize, or monopolize someone’s time. Give credit where due. Avoid exploiting systems or people.
- **How to practice:** Notice urges to grab or cut corners; practice honesty with money and time; cultivate gratitude for what you have. Return found items and cite sources.
- **Benefits:** Reduces guilt and conflict, promotes fairness and abundance mindset.
- **Pitfall:** Legalistic focus on property while ignoring more subtle appropriations (like emotional stealing or taking undue credit).

## 4. Brahmacharya — wise use of energy / moderation of sensual impulses

- **Sanskrit + literal:** ब्रह्मचर्य — often translated as “celibacy” or “moving toward Brahman,” but in practical yogic terms it’s moderation and skillful use of vital energy.
- **Meaning:** Channelling life force (sexual, creative, mental) responsibly; not being enslaved by senses or cravings. For some practitioners, it may imply celibacy during certain stages; for most, it means balanced, conscious sexual/energetic conduct.
- **Practical examples:** Avoid compulsive sexual sensations and have the power of control over your desires.
- **How to practice:** Breathwork (pranayama), cultivate hobbies that refine attention, set boundaries around.
- **Benefits:** Greater mental clarity, sustained energy, improved focus.
- **Pitfall:** Using brahmacharya as moral judgment against others; either extreme repression (shame) or justification of harmful behavior in the name of “energy.”

#### 5. Aparigraha — non-hoarding / non-greed / non-attachment

- **Sanskrit + literal:** अपारिग्रह — “not taking hold / non-possessiveness.”
- **Meaning:** Letting go of unnecessary accumulation and clinging — to objects, people, ideas, or outcomes. Cultivating contentment and simplicity.
- **Practical examples:** Avoid impulse buying, free yourself from toxic relationships rather than clinging, share resources, practice minimalism.
- **How to practice:** Declutter regularly, practice generosity (dāna), reflect on impermanence, question “Do I need this?” before buying.
- **Benefits:** Less anxiety about loss, more freedom, deeper gratitude, simpler life.
- **Pitfall:** Misreading aparigraha as forced poverty — it’s about freedom from compulsive attachment, not denying necessary comfort.

#### ii) **NIYAMAS** — personal observances (how we relate inwardly to ourselves, in short – personal discipline)

Explanation: There are **5 Niyamas**

##### 1. **Shaucha (Śauca)** — purity / cleanliness

- **Sanskrit + literal:** शौच — “purity.”
- **Meaning:** External cleanliness (body, surroundings) and inner purity (mind, emotions). Purity here is about clarity and health, not moral superiority.

- **Practical examples:** Daily bathing, clean living space, sattvic diet when appropriate, cleansing mental habits like negative self-talk.
- **How to practice:** Regular hygiene, kriyas (cleansing practices) if trained, mindful eating, meditation to purify thought patterns.
- **Benefits:** Improved health, clearer concentration, reduced distractions, a calmer nervous system.
- **Pitfall:** Obsessive cleanliness that becomes avoidance or control; shaucha expects balance and compassion toward self.

## 2. Santosha — contentment

- **Sanskrit + literal:** संतोष — “contentment.”
- **Meaning:** Finding satisfaction in the present, cultivating inner peace regardless of external circumstances. Not resignation, but an acceptance that coexists with healthy effort.
- **Practical examples:** Gratitude journaling, appreciating small joys, resisting constant comparison to others.
- **How to practice:** Daily gratitude practice, mindful savoring, noticing cravings and letting them pass, balancing ambition with acceptance.
- **Benefits:** Greater resilience, lower anxiety, stronger relationships, contented motivation.
- **Pitfall:** Using santosha as an excuse for stagnation. It doesn’t remove the value of aspiration — it simply changes the motivation behind action.

## 3. Tapas — disciplined effort / austerity

- **Sanskrit + literal:** तपस् — “heat” or “ardor.”
- **Meaning:** Self-discipline and committed practice that burns away impurities — steady effort in sadhana (practice), lifestyle, or work. Tapas produces transformation.
- **Practical examples:** Regular yoga and meditation practice, healthy routines, working persistently toward goals despite discomfort.
- **How to practice:** Set realistic, measured disciplines (e.g., 20 minutes daily practice), cold showers, mindful fasting, focused work blocks. Gradual escalation rather than extremes.
- **Benefits:** Willpower, inner strength, momentum in personal growth, capacity to face challenges.
- **Pitfall:** Ascetic extremes that harm body or relationships; tapas must be tempered by ahimsa and self-care.

## 4. Svadhyaya — self-study / study of scripture

- **Sanskrit + literal:** स्वाध्याय — “self-study.”
- **Meaning:** Study of sacred texts and the self — observing one’s habits, thoughts, and patterns; learning from scriptures, teachers, and inner reflection.
- **Practical examples:** Reading Yoga Sutras, Bhagavad Gita, biographies of wise people; journaling; honest reflection after actions; therapy.

- **How to practice:** Keep a practice journal, set aside time for study and reflection, use inquiry questions (Why did I react? What triggered me?). Use reading to inform practice, not as mere intellectualism.
- **Benefits:** Greater self-awareness, wiser choices, alignment between values and actions.
- **Pitfall:** Intellectualizing spirituality without heartfelt practice; using texts to justify egoic positions.

#### 5. Ishvara Pranidhana — surrender to the higher / devotion

- **Sanskrit + literal:** ईश्वरप्रणिधान — “surrender to Ishvara (God/Highest).”
- **Meaning:** Offering actions and results to a higher principle; cultivating humility, devotion, trust, and letting go of ego-driven outcomes. Ishvara needn’t imply a theistic god — it can mean universal consciousness, the flow of life, or your highest values.
- **Practical examples:** Dedicate your practice to something larger, practice mantra or bhakti (devotional) practices, accept outcomes with equanimity.
- **How to practice:** Short prayers, silent dedication before practice, mantra recitation, service (seva) to others, cultivating trust in processes beyond control.
- **Benefits:** Reduced anxiety about results, greater peace, more selfless action, deeper spiritual receptivity.
- **Pitfall:** Passive fatalism — surrender is active trust, not giving up responsibility.

### 3. Asana – Physical Postures

- iii) **Meaning:** In Sanskrit the definition of asana is “Thir Susham Asanam”. The word *Asana* means “seat” or “posture.” In yoga, it refers to steady and comfortable physical postures that prepare the body for meditation.
- iv) **Purpose:** To make the body strong, flexible, and healthy while developing balance between body and mind.

- vi) **Benefits:** Improves posture, blood circulation, muscle tone, and concentration; reduces stress and physical ailments.
- vii) **Goal:** A balanced, relaxed body that supports a calm and focused mind

### 4. Pranayama – Breath Control

- **Meaning:** *Prana* means “life force” or “vital energy,” and *Ayama* means “expansion” or “control.” Together, *Pranayama* means control and expansion of life energy through the regulation of breath.

- **Purpose:** To purify the mind and body, control emotions, and prepare for higher states of consciousness.
- **Practice:** Techniques like *Anulom Vilom (alternate nostril breathing)*, *Kapalabhati (cleansing breath)*, *Bhramari (humming bee breath)*, etc.
- **Benefits:** Increases lung capacity, balances the nervous system, relieves stress, and enhances mental clarity.
- **Goal:** To connect the body and mind through rhythmic, mindful breathing.

## 5. Pratyahara – Withdrawal of the Senses

- **Meaning:** *Prati* means “against” and *ahara* means “taking in” — so *Pratyahara* means withdrawing the senses from external objects.
- **Purpose:** To turn the mind inward by detaching it from distractions of the outer world.
- **Practice:** During meditation, focusing inward, ignoring noises, and remaining unaffected by sensory impulses.
- **Benefits:** Improves self-control, inner awareness, and mental discipline.
- **Goal:** To prepare the mind for deep concentration and meditation.

## 7. Dhyana – Meditation

- **Meaning:** *Dhyana* means “continuous meditation” or “deep contemplation.”
- **Purpose:** To achieve a continuous flow of awareness toward the chosen object without distraction.

- **Practice:** Sitting quietly, observing thoughts without attachment, or meditating on a symbol, sound, or divine presence.
- **Benefits:** Reduces stress, increases insight, develops inner peace and spiritual understanding.
- **Goal:** To experience unity of mind and consciousness — sustained inner stillness.

## 8. Samadhi – State of Spiritual Absorption or Enlightenment

- **Meaning:** *Samadhi* means “total absorption” or “oneness.” It is the final stage of yoga, where the meditator, the process of meditation, and the object of meditation become one.
- **Purpose:** Liberation (*moksha*) — freedom from ego and duality, experiencing ultimate bliss and unity with the Divine.
- **Practice:** Achieved naturally after deep meditation and devotion.
- **Benefits:** Brings complete peace, self-realization, and transcendence beyond physical and mental limitations.
- **Goal:** The ultimate aim of yoga — **union of individual consciousness with universal consciousness.**
